EXPERIENCES

Technical Project Manager

Freelancer.com Sep 2025 – Present

- Directed as a Co-Pilot under Freelancer to manage an end-to-end delivery to client technology projects, overseeing scoping, milestone planning, stakeholder alignment, and execution across modern web stacks.

Co-Pilot - Tamkeen Partnership Program Dec 2025 – Present

- Managed structured student operations, including performance tracking and reporting oversight.
- Maintained accurate visibility of project completion status, engagement levels, and high-value contributions.
- Supported program accountability through organized data monitoring and consistent progress evaluation.

Prominence Bank – Digital Banking Platform Jan 2026 – Feb 2026

- Planned the design and deployment of a digital banking platform incorporating compliance frameworks and digital asset capabilities.
- Ensured alignment with KYC and KTT regulatory requirements while maintaining operational security and system integrity.
- Supervised backend infrastructure configuration within Ubuntu environments to support secure and consistent transaction processing.
- Maintained scalable architecture capable of handling high-volume financial transactions and evolving compliance demands.

InnerX - AI-Based Emotional Analytics Platform Nov 2025 – Dec 2025

- Led the architectural planning and technical direction of a real-time emotional analytics platform, ensuring system stability and long-term scalability.
- Integrated voice recognition capabilities within a contextual knowledge framework to support accurate and responsive user interactions.
- Designed and implemented a vector database infrastructure to enable advanced semantic indexing and contextual data retrieval.
- Guided cross-functional engineering teams while maintaining performance standards, reliability, and disciplined project execution.

Full-Stack Web Developer Intern

Kynatech – Codennected Technologies Co. Ltd Sept 2024 – Oct 2024

- Built a Next.js web application using Supabase, Prisma, and NextAuth, to implement User Authentication, Timesheet, and Payroll logic via RESTful APIs.
- Participated in an Agile Development, reported progress bi-hourly, collaborated with the Team and CTO for real-time feedback and mentorship.

PROJECTS

Protecture – Securing Creative Architecture Design with FGSM Perturbation Technique

Next.js, FastAPI, Prisma, Supabase Nov 2024 – Apr 2025

- Developed a web-based platform for securing architectural designs against AI exploitation using the Fast Gradient Sign Method (FGSM) perturbation technique, allowing users to upload images that are adversarially protected while maintaining visual integrity.

TECHNICAL SKILLS

Management Tools: Word, Excel, Jira

Languages & Frameworks: JavaScript/TypeScript, PHP, Python, Next.js, Django, FastAPI

Front-end Development: HTML, CSS, TailwindCSS

Backend & APIs: REST APIs, Prisma ORM, RAG

Databases & Storage: MySQL, Supabase, Firebase, Pinecone

Tools & Testing: VS Code, Git, Vercel, Render

EDUCATION

Bataan Peninsula State University – Main Campus 2021 –2025

Bachelor of Science in Computer Science, Major in Network and Data Cum Laude

CHED Scholar
