EXPERIENCES

Technical Project Manager

Sep 2025 – May 2026

Freelancer.com

- Directed end-to-end delivery of client technology projects, including scoping, milestone planning, stakeholder alignment, and execution across modern web stacks.
- Managed project timelines, resource coordination, and client expectations across concurrent engagements.

Cross-Platform E-Commerce – Jackie's Body Oil, Multimedia Art & Jewelry

Apr 2026 – May 2026

- Defined project specifications, delivery phases, and design milestones for a Shopify store integrated with an existing Etsy marketplace.
- Managed client and developer communications, facilitating meetings and calls to align expectations and drive progress.

Co-Pilot – Tamkeen Partnership Program

Dec 2025 – Apr 2026

- Tracked student performance, engagement, and reporting across structured program operations.
- Supported accountability through consistent progress evaluation and data-driven check-ins.

Noticer – Mobile Version Implementation

Feb 2026 – Mar 2026

- Ran sprint planning and milestone tracking to keep delivery on schedule across iterative cycles.
- Bridged design and development teams, aligning priorities and clearing blockers in real time.

Prominence Bank – Digital Banking Platform

Jan 2026 – Feb 2026

- Scoped and oversaw deployment of a digital banking platform with built-in compliance frameworks and digital asset capabilities.
- Ensured full alignment with KYC and KTT regulatory requirements throughout the build.

InnerX – AI-Based Emotional Analytics Platform

Nov 2025 – Dec 2025

- Shaped architectural planning and technical direction for a real-time emotional analytics platform.
- Designed a vector database structure for semantic indexing and fast retrieval.

Full-Stack Web Developer Intern

Sept 2024 – Oct 2024

Kynatech – Codennected Technologies Co. Ltd

- Built a Next.js application using Supabase, Prisma, and NextAuth for authentication, timesheet, and payroll systems.
- Worked in Agile environment with continuous reporting and collaboration with CTO.

PROJECTS

Protecture – Securing Creative Architecture Design with FGSM

Nov 2024 – Apr 2025

- Developed a platform to protect architectural designs from AI exploitation using FGSM perturbation.
- Enabled secure image uploads with adversarial protection while preserving visual integrity.
