EXPERIENCES

- Co-Pilot | Technical Project Manager
- Freelancer.com

Oct 2025 – Present

 - Directed project scoping, milestone planning, stakeholder coordination, and delivery governance across modern web technology stacks, ensuring alignment between technical execution and client expectations.
 - Led the architectural planning and development oversight of InnerX, an AI-driven platform utilizing OpenAI-based voice recognition and Retrieval-Augmented Generation frameworks for real-time emotional analysis and therapeutic guidance. Supervised the implementation of Pinecone vector database architecture to enable contextual indexing and advanced semantic retrieval.
 - Managed the development and training oversight of machine learning models for surgical education simulations, collaborating with academic stakeholders to ensure data integrity, model reliability, and clinically aligned performance outcomes.
 - Oversaw the architecture and execution of a digital banking platform incorporating KYC and KTT compliance frameworks alongside cryptocurrency functionalities. Supervised backend infrastructure deployment and system configuration within Ubuntu-based environments, ensuring operational security, regulatory alignment, and scalable financial transaction processing.
 - Managed student operations under the Tamkeen partnership, overseeing structured data tracking and performance reporting. Monitored project completion status, high-value project involvement, and ongoing engagements to ensure accurate visibility and program accountability.

- Full-Stack Web Developer Intern
- Kynatech – Codennected Technologies Co. Ltd

Sept 2024 – Oct 2024

 - Built a Next.js web application using Supabase, Prisma, and NextAuth, to implement User Authentication, Timesheet, and Payroll logic via RESTful APIs.
 - Participated in an Agile Development, reported progress bi-hourly, collaborated with the Team and CTO for real-time feedback and mentorship.

PROJECTS

- Protecture – Securing Creative Architecture Design with FGSM Perturbation Technique
- Next.js, FastAPI, Prisma, Supabase

Nov 2024 – Apr 2025

 - Developed a web-based platform for securing architectural designs against AI exploitation using the Fast Gradient Sign Method (FGSM) perturbation technique, allowing users to upload images that are adversarially protected while maintaining visual integrity.

TECHNICAL SKILLS

Management Tools: Word, Excel, Jira

Languages & Frameworks: JavaScript/TypeScript, PHP, Python, Next.js, Django, FastAPI

Front-end Development: HTML, CSS, TailwindCSS

Backend & APIs: REST APIs, Prisma ORM, RAG

Databases & Storage: MySQL, Supabase, Firebase, Pinecone

Tools & Testing: VS Code, Git, Vercel, Render

EDUCATION

Bataan Peninsula State University – Main Campus

2021 –2025

Bachelor of Science in Computer Science, Major in Network and Data

Cum Laude

CHED Scholar
